REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The primary reasons for allowance for claims 1-10 is that applicant's claimed invention includes an ink-jet printing head where each of the pressure chambers has a depth of 35 μ m - 45 μ m in a direction perpendicular to the one of the opposite surfaces of the flow-passage unit. It is this limitation, expressed in the claimed combination not found, taught, or suggested in the prior art that makes these claims allowable over the prior art.

United States patent number 6,682,178 B2 to Yazaki discloses an ink-jet recording head where "the passage-forming substrate 10 (the depth of the pressure generating chamber 12) was varied over the range of 45 μ m to 90 μ m" (Column 8, lines 64-66; Table 1, examples 1-4). In theory the range of the instant application and the range disclosed by Yazaki overlap. However, as shown in Figure 8 of the instant application, a pressure chamber depth of 40 μ m produced an unexpected result of reduction in ink ejection velocity variation as a function of pulse width variation. Also, Figure 8 illustrates undesired ink ejection velocity variation as a function of pulse width variation when the pressure chamber depth is 50 μ m.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

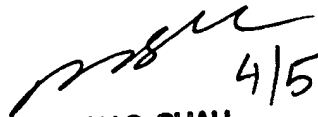

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Geoffrey Mruk whose telephone number is 571 272-2810. The examiner can normally be reached on 7am - 330pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Meier can be reached on 571 272-2149. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
